

Sat 19th May 2-5pm, York

Homes for the Future

Design by Phil Bixby

Explore a selection of buildings combining different building design techniques to achieve healthy homes and offices that do not cost the Earth to run. In your own time or on our cycle ride, use this unique opportunity to visit one or all:

- **Three Passivhauses:** designed to use very little energy, each with its own unique features. Booking essential **B**
- **An eco-retrofitted Victorian house** of local architect Phil Bixby, designer of the Passivhauses. Booking essential **B**
- **York Eco Depot** (Hazel Court YO10 3DS): one of Europe's largest straw bale buildings with other eco features and the home of City of York Council's industrial teams. No need to book.

Entry is free; donations to St Nicks welcome
